

MOODLE STUDENT GUIDE

The screenshot shows a Moodle course interface. On the left is a navigation sidebar with 'Administration' and 'Navigation' sections. The main content area displays the course title 'microVET' and the current page 'Learning journal'. It features a forum post titled 'Welcome all' and an assignment titled 'Setting up your learning journal'. Below the assignment, there is a section 'From involvement to engagement' with a page titled 'The benefits and types of parental engagement with schooling'. The interface includes a search bar, a user profile, and various course management buttons like 'Turn editing on'.

Learning journal

FORUM
Welcome all

In this module you will learn about the importance and challenges of parental engagement at school and in children's learning, explore your own prejudices, receive tips on how to engage parents and how to improve communication between school staff and parents.

ASSIGNMENT
Setting up your learning journal Mark as done

In this module you are going to need a learning journal to reflect on your own practices, skills and thoughts, but also to share your thoughts with other participants.

As you progress, we will ask you to think about, explore and discuss a variety of topics in a journal of your creation. We propose that you create a digital one and the best solution is to use a free blogging platform like WordPress, Blogger, Medium or similar. You can also share your entries in a professional blog that you already have, it can be written, but you can also decide to create audio recordings or videos. As you respond to the prompts in the course, you can make your blog your own, complete with your thoughts and opinions. When you have "essay" questions in the modules, record your response in your blog. You don't need to write extensive texts, short 1-2-paragraph-long summaries or bullet points of your ideas are enough.

Opened: Saturday, 1 April 2023, 12:00 AM

WELCOME TO YOUR STUDY

This guide is designed to help you get started on Moodle.

TECHNICAL REQUIREMENTS FOR USING MOODLE

To use our online learning space effectively you will require a computer with an internet connection. Online units may be data heavy so the better your internet connection the easier it will be to access your learning material and interact online.

Use a broadband connection (256 Kbit/sec or faster—for optimal viewing of videos and online presentations) through USB wireless modem, ADSL, T1/T2, fibre optic or cable. For optimal performance, you should use the system components listed here. Other settings may lead to some functionality being lost.

Accessing Moodle

Desktop

The following desktop operating systems support Moodle:

- Windows 7, Windows 10, Mac OSX Sierra, iPad IOS10

The following browsers are recommended:

- Google Chrome 32 bit version 50 or later
- Safari 10 or later

Set your screen resolution to 1024 x 768 or higher for optimal experience of your online space. The following settings should be enabled:

- Cookies
- Pop-ups (in both Internet browser and security software)
- Javascript
- ActiveX

The following plugin and readers should be used:

- We recommend the latest version of [Adobe Flash Player](#)
- We recommend that you use the latest version of [Adobe Acrobat Reader](#)

All Firewalls should be set to enable file uploads.

Mobile

Mobile browser

You can access Moodle on mobile devices by opening the weblink in your mobile web browser. Please note that the mobile experience may be somewhat restrictive in comparison to the full desktop experience.

The Moodle Mobile app

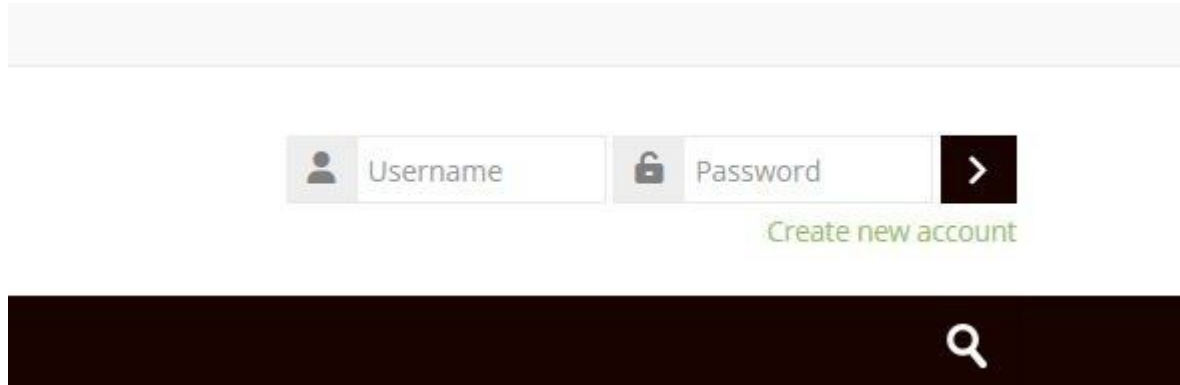

The Moodle Mobile app is available for free from Google Play and the Apple Store.

- [Apple Store - Moodle Mobile app](#)
- [Google Play – Moodle Mobile app](#)

You can also install the app directly from your mobile device by searching for 'Moodle Mobile' with author/owner 'Moodle Pty Ltd'.

For further information relating to Moodle Mobile refer to the moodle.org FAQ https://docs.moodle.org/34/en/Moodle_Mobile_FAQ

Logging onto the Moodle

A screenshot of the Moodle login interface. At the top is a light gray horizontal bar. Below it are two input fields: the first is labeled 'Username' with a person icon, and the second is labeled 'Password' with a lock icon. To the right of the password field is a black button with a white right-pointing chevron. Below these fields is a green link that says 'Create new account'. At the bottom of the form is a dark gray horizontal bar with a white magnifying glass icon on the right side.

To access the MicroVet and your unit/s please click on the following link: <https://microvet-vle.eu/>

MicroVet username and password

A username and password are provided for you via email at the beginning of the first semester that you begin your service with MicroVet. If you have lost your details please contact MicroVet. After you first login you will be prompted to reset your password through the profile section. You can reset your password via the login page of the MicroVet by clicking on the '*Forgotten your username or password?*' link.

Navigating Around Moodle

Home (the front page)

The front page is the initial page seen by someone after a login. Typically, a student will see the welcome message, enrolled courses along with some blocks of information such as latest announcements or a calendar. In the Navigation bar and Navigation block it is called "Home".

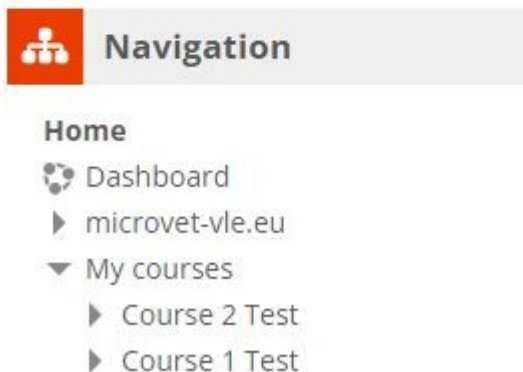

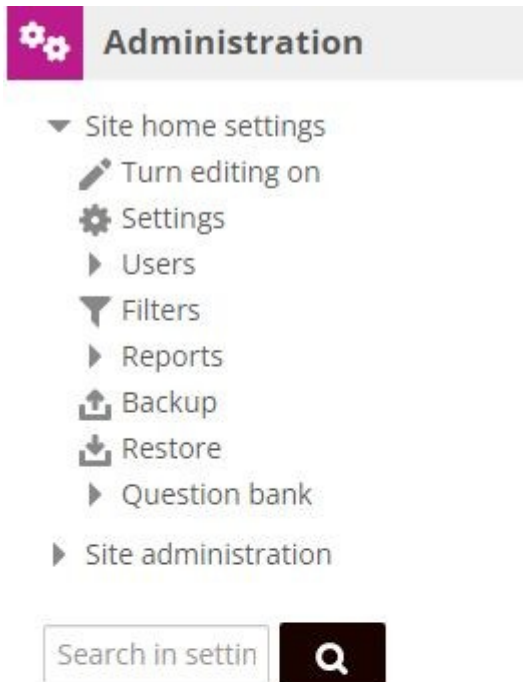

Figure 1 - The Navigation Draw via home

Figure 2 - The Navigation Draw via a unit

The Dashboard

The Dashboard is a customisable page with details of progress and upcoming deadlines. In the centre is the course overview block which allows students to easily track required activities and filter units.

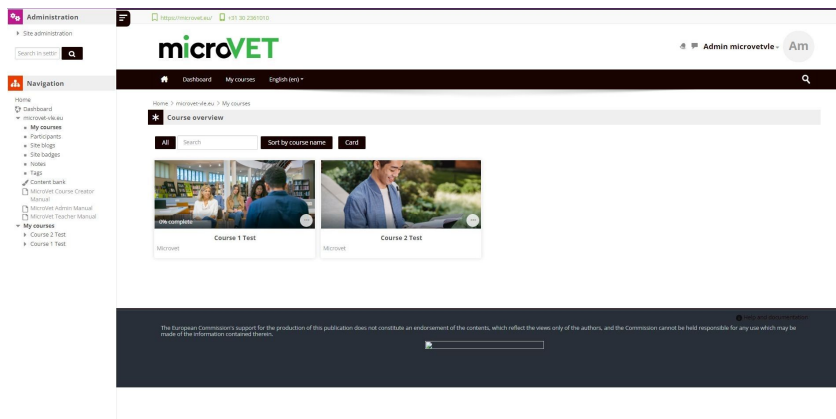

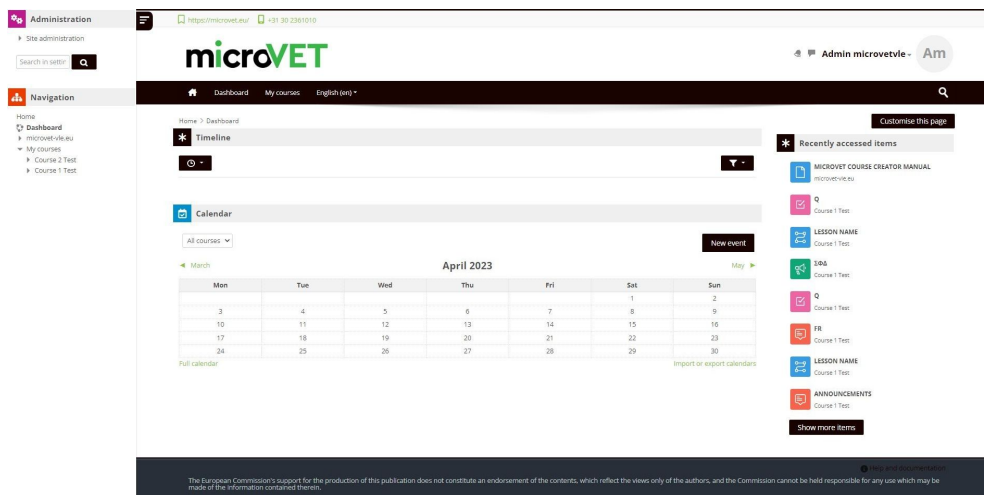

Figure 3 - dashboard displaying the course overview

You can quickly assess the dashboard from the **user menu** on the top right of the screen along with quick access to the grade and messages sections.

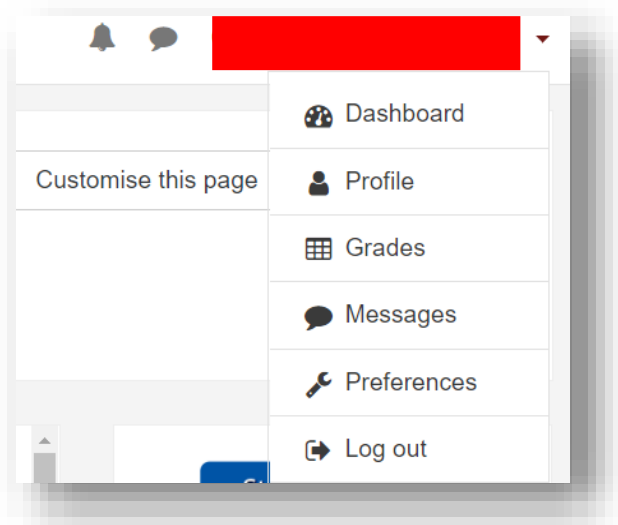

Figure 4 - Dashboard link as displayed in the user menu

Unit Navigation

Units on MicroVet are split into defined sections. These sections can contain text, weblinks, activities such as assignments, resources and attachments. MicroVet has a default layout that it uses for its units with defined sections. An indicative example is shown and described below.

Please note that depending on the unit of study, the layout and sections may differ.

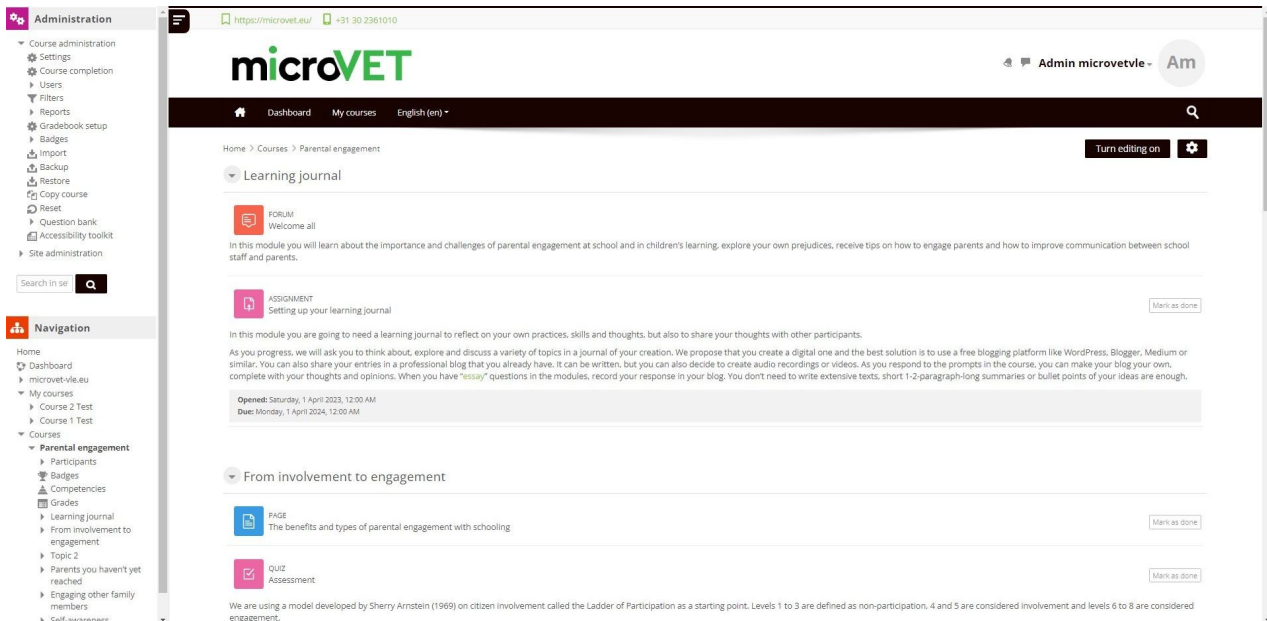

Figure 5 - A unit displayed within the MICROVET Q: isn't this th old look above?

Each section/topic can be accessed by clicking on the section name. Only a summary is shown on the unit main page. Again is this our final look?

1. Course Overview

- Unit name and codes
- Link to unit chair and profile
- Unit announcement forum
- Unit discussion forum

2. Getting started

- Setting the scene
- MicroVet guide
- Unit Specification

3. Assessment

- Overview of the assessment for the unit and a breakdown of the grading and requirements to achieve a passing mark
- Unit assessment guide (including how to upload an assessment)
- The individual assessment/s for the unit

4. Additional Unit resources

- Additional resources not included in the study material but support the learning or completion of assessment items.
For example, Austroads guides, Technical notes, software etc. This material should be reviewed at the beginning of the semester and when brought to the students attention by the Unit Chair.

5. Study Material overview (set)

- Overview of the material and its purpose

- A PDF set of the study material (topics and readings).

6. Study material (individual topics)

- Each topic will be displayed in its own section.
- Each topic section includes an overview of the topic, a downloadable PDF of the topic material and any links or additional readings.
- Unit Chairs may add additional supporting material, references and/or links in these sections throughout the semester.
- Unit chairs may add additional activities to a topic such as a quiz or survey

Your Moodle Profile

Your MicroVet profile determines what information other users can see about you in a unit. It's also where you choose how you want to receive emails from MicroVet, subscribe to forums and edit text. When you're first enrolled on to MicroVET, the system creates a personal profile for you.

You can:

1. add a **profile picture** of yourself which will display next to your contributions—for example, to your posts on discussion forums.
2. add your **profile** (academic, professional). To give others a better understanding of you and your background. Ensure this content is suitable for others to view.
3. specify whether the MICROVET should **display** your email address to others (by default this is set to off).
4. select the method Moodle should use to **notify** you of what's happening in your courses.

View/edit your profile

To view and or edit (optional) your profile, click on the profile icon from the user menu dropdown on the top right of the screen.

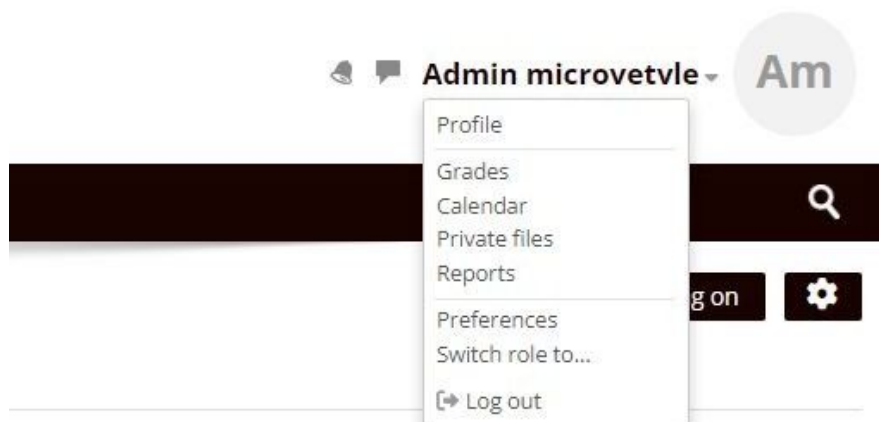

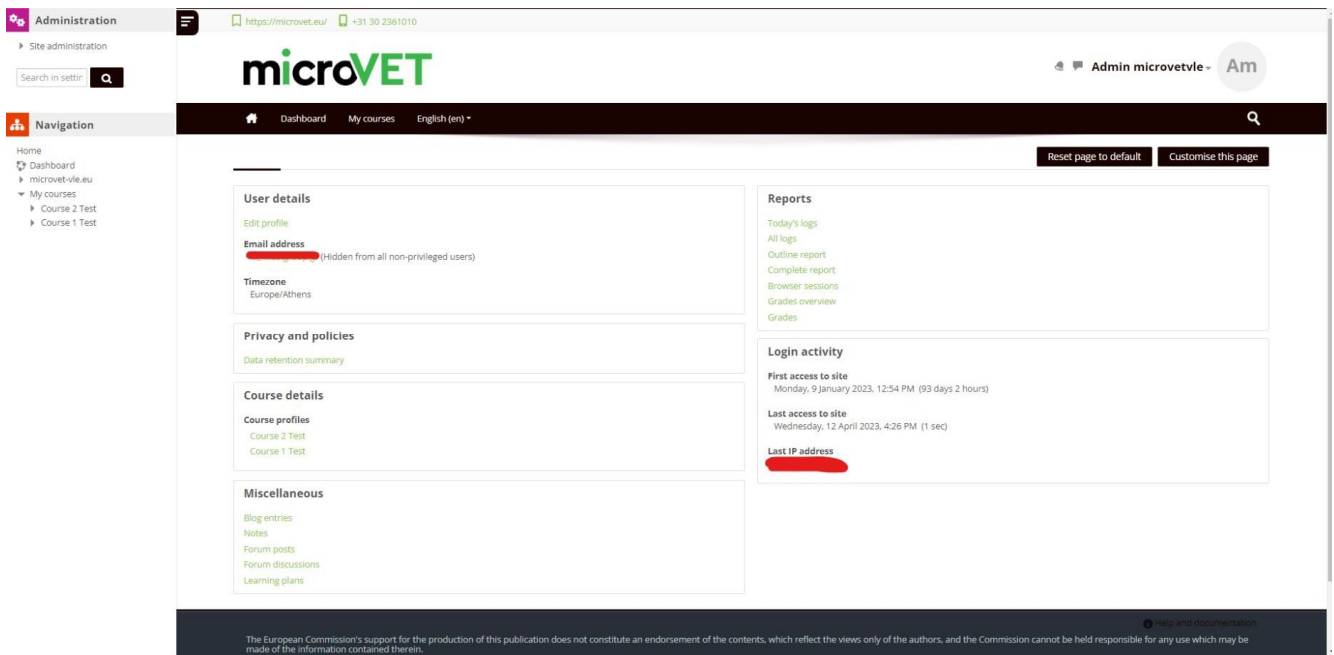

Figure 6 - Profile link as displayed in the user menu

To edit your profile, from the Profile page (home/dashboard/profile) click on the gear icon and then the Edit Profile link

The screenshot shows the MICROVET user profile page. The page has a dark header with the MICROVET logo and navigation links for Dashboard, My courses, and English (en). A search bar is visible in the top right. The main content area is divided into several sections: 'User details' (with links for Edit profile, Email address, and Timezone), 'Privacy and policies' (with a link for Data retention summary), 'Course details' (with links for Course profiles, Course 2 Test, and Course 1 Test), and 'Miscellaneous' (with links for Blog entries, Notes, Forum posts, Forum discussions, and Learning plans). On the right side, there are sections for 'Reports' (with links for Today's logs, All logs, Outline report, Complete report, Browser sessions, Grades overview, and Grades) and 'Login activity' (with links for First access to site, Last access to site, and Last IP address). The page also includes a footer with a disclaimer about the European Commission's support.

The edit profile page allows you to update your profile details including a detailed profile description and a profile picture.

Once you are satisfied with your profile, click update profile at the bottom of the screen to save.

Note – All personal information, files and any other types of data submitted or placed on the MICROVET may be viewed or retained by MICROVET as part of data integrity and security control. Data submitted or placed on to the MICROVET that does not conform to the Student Use of the MICROVET or the Student Code of Conduct will be removed or deleted.

Assessments

Activities

An activity is a general name for a group of features in a Moodle course. Usually an activity is something that a student will do that interacts with other students and or the Unit Chair.

There are different types of activities in a Moodle however in the MICROVET, primarily the Assignments activity this is the most common used and is the standard assessment tool provided by Unit Chairs to students.

The Assignment Activity

Assignments allow students to submit work to their teacher for grading. The work may be text typed online or uploaded files of any type specified. The teacher will then grade these submitted submissions and provide feedback and a grade via the assignment activity block. Students may be required to submit as individuals or in groups.

It can also be used to remind students of 'real-world' assignments they need to complete offline and thus not require any digital content.

Assignments have deadlines and cut off dates

Assignment (Submission) types

Students can type directly into Moodle, upload files or add media.

File submissions: Students can upload files of any type the teacher specifies. The teacher can specify the maximum number of files which may be uploaded and a maximum size for each file.

Students may be able to add a note (comment) to their teacher when they submit their work.

Feedback types

Teachers may give feedback in various ways.

Students may upload documents such as .docx, odt and PDF and the teacher can annotate directly on the student's submission.

Feedback comments: allows graders to leave comments about the students' submissions as well as grades.

Feedback files allows graders to upload files with feedback when marking. These files may be the marked up student assignments, documents with comments, a completed marking guide, or spoken audio feedback.

Grading assignments

Assignments will be graded as per the assessment information for each assignment. This can include a percentage mark, a pass/fail or a more complex rubric depending on the unit and assessment provided.

Submitting Your Assignments and Receiving Feedback

The MICROVET uses an Assignment Activity for most of the assessment given via the system.

Submitting Assignment for Assessment

The following image shows the file upload area in an assignment activity. This section is at the BOTTOM of the assignment page and you may need to scroll down to view it.

Assignment Requirements

Information regarding the assignment itself and what required is to complete the assignment is contained in the PDF document below.

Assignment Cover Sheet

Please ensure that you complete the cover sheet and attach it to the front of your assignment. This word document should also be used to complete your assignment.

Submission

Upload your completed assignment as a PDF document using the submission button below.

SUBMISSION STATUS

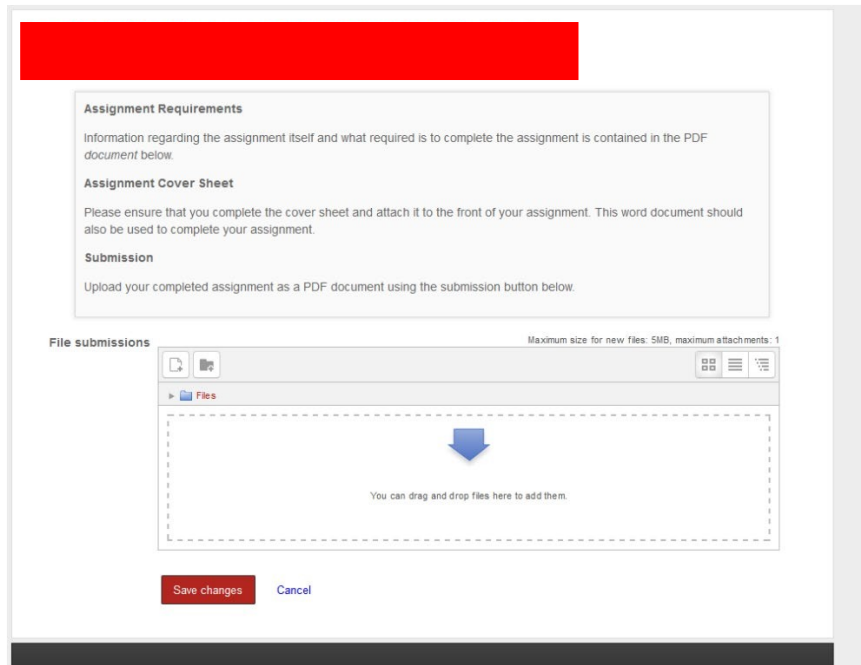

Attempt number	This is attempt 1.
Submission status	No attempt
Grading status	
Due date	
Time remaining

Submission comments	

Add submission

Uploading a file

File picker method

1. Select 'Add' by clicking on the '+' file icon or any buttons along the Add bar.
2. A pop up window, shown below, will appear.
3. Select the 'Upload a file' option, then click on 'Choose a file' button.
4. Navigate to where your file is located.
5. You can rename the file..
6. Remember to click the 'Save changes' button.

Drag and drop method

Into the file upload box, surrounded by a dashed line, drag and drop the file you want to attach (i.e. from your computer).

Click the 'Save changes' button.

Your assignment will be uploaded as a "**DRAFT**" at this point.

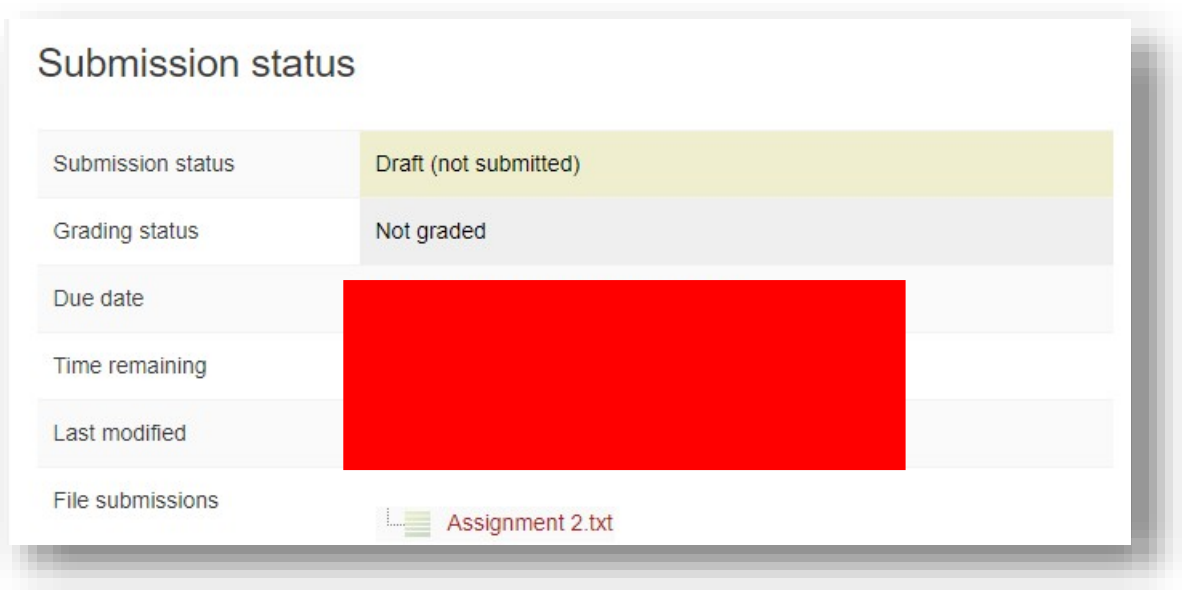

Figure 8 - Assignment in DRAFT submission state

Viewing and editing your submission

Returning to the assignment page, scroll to the bottom of that page and you will see the submission status of your assessment.

Provided the due date has not passed you can view **and** edit your submission.

Figure 9 - Edit submission button found under the Submission status section

Editing your Submission

To edit your submission, click on the edit submission button and repeated the steps above for submitting assessment.

It is advised that you delete any previously submitted versions of your assessment to avoid these being graded in error.

Formal Submission of your Assignment

Once you are satisfied with your assessment you will be required to formally submit. To do this, return to the assignment page and scroll down to the submission status section. At the bottom of this section click on submit assignment (note – no further alterations to your assessment can be made once formal submission has taken place).

Submission status

Submission status	Draft (not submitted)
Grading status	Not graded
Due date	
Time remaining	
Last modified	
File submissions	 Assignment 2.txt
Submission comments	 Comments (0)

Edit submission

Make changes to your submission

Submit assignment

Once this assignment is submitted you will not be able to make any more changes.

Acknowledgement and formal submission

You are required to accept the check the acknowledgement box declaration before you can formally submit. **Mark the check box and click on continue to submit.**

This assignment is my own work, except where I have acknowledged the use of the works of other people.

By submitting this assignment for assessment i acknowledge that:
This assignment is submitted in accordance with the CPEE Assessment Policy
www.pavementeducation.edu.au/study/our-policies

Figure 10 – Submission Acknowledgement check box

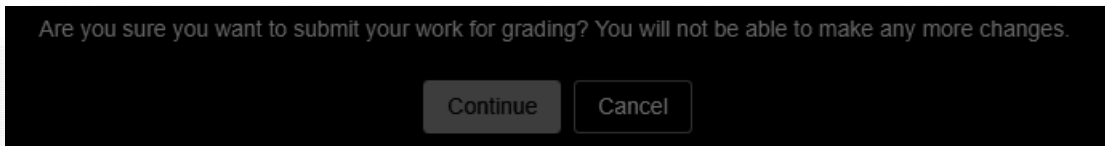

Figure 11 - Formal submission final notification

Important –

- Assignments in draft status following the passing of the deadline will be assessed as being submitted.
- Any assignment lacking the assignment cover sheet will not be graded until a cover sheet is received and penalties will be applied in line with late assignment submission.

Submission status - post submission

The assignment submission status will indicate that your assignment has been submitted for grading

SUBMISSION STATUS	
Attempt number	This is attempt 1.

Figure 13 - Submission status with feedback and grade

Forums / Discussion Boards

Each unit has its own dedicated forum/discussion board. This forum is to be used by both staff and students participating in the unit and is a central place for participants to converse about the Unit, its assignments and Topics.

The forum activity allows students and teachers to exchange ideas by posting comments as part of a 'thread'. Files such as images and media maybe included in forum posts.

Forums are the primary communication tool for teachers and students during the semester.

Each unit has 2 default forums.

1. News and Announcements
2. Unit Discussion Forum

The News and Announcements

- **The News forum in the MICROVET is for teachers to post announcements. It is NOT a discussion forum for students.**
- It is one way communication > teacher to student. Students cannot post or reply to a post made on this forum.

- All students are subscribed and cannot unsubscribe.

It is used when:

- Notifying the class of important unit dates, any changes to assessment, class wide general feedback, notification to Unit Chair availability.

The Unit Discussion Forum

- **This is an open unit forum.**
- Student can post and reply to all discussions.
- All students are subscribed however they can unsubscribe at any stage.

Should be used when:

- Asking a question to the Unit Chair
- Engaging with other students and the Unit Chair
- Notifying the class, group or individual students of further opportunities to learn.
- The Unit Chair may ask a question to the class or pose a thought provoking questions to stimulate discussion and learning
- Building the teacher student relationship
- Fostering the class relationship and sharing of ideas

Forum should **not** be used for

- Providing assignment solutions
- Discussions relating to assessment answers
- Personal information
- Private correspondence
- Commenting on any exam paper questions and answers
- Asking what other students received in an assessment item

How to add a new discussion to a forum

On the forum's home page, click **Add a new discussion topic**.

Parental engagement Welcome all

In this module you will learn about the importance and challenges of parental engagement at school and in children's learning, explore your own prejudices, receive tips on how to engage parents and how to improve communication between school staff and parents.

Search forums **Q** **Add discussion topic**

On the 'Your new discussion' topic page, enter a Subject and Message as text, audio or video. It's good to specify here whether students are to only reply to the topic you've posted or are free to add new discussion topics themselves. Add any necessary links, images or text files.

The default content of **Subject** is usually 'Re: <the name of the 'parent' post>' however this can be changed. Students may be receiving multiple unit forums notifications, so it is good practice to include the short unit name in the subject line.

Limit one topic per forum post so as not to confuse others when replies come in

Pinned posts

Teachers may 'pin' certain important discussions to the top of a forum. Any forum discussions which come after that will appear underneath this pinned post. Pay extra attention to these posts as they likely contain important information regarding your unit.

Sharing images through forums

When an image is 'attached' as a file to a forum message, it is immediately displayed full size after the message (i.e. no need to click on an attachment). This is an excellent way of sharing images without having to go through the process of uploading them as files and linking them from within web pages.

Sharing sound and video through forums

If multimedia filters are enabled, a sound file (mp3) or accepted video file can be attached and it will be embedded into the forum post in an appropriate player.

Post length

Extra-long posts cause problems when doing a forum search and can be difficult to read on screen. Rather than creating a very long post, consider copying and pasting the text into a text file and add it as an attachment to your forum post.

Post editing time limit

There is a time limit for editing posts, usually 30 minutes so it is a good idea to compose your message in a program such as Word and paste into the forum when you are ready.

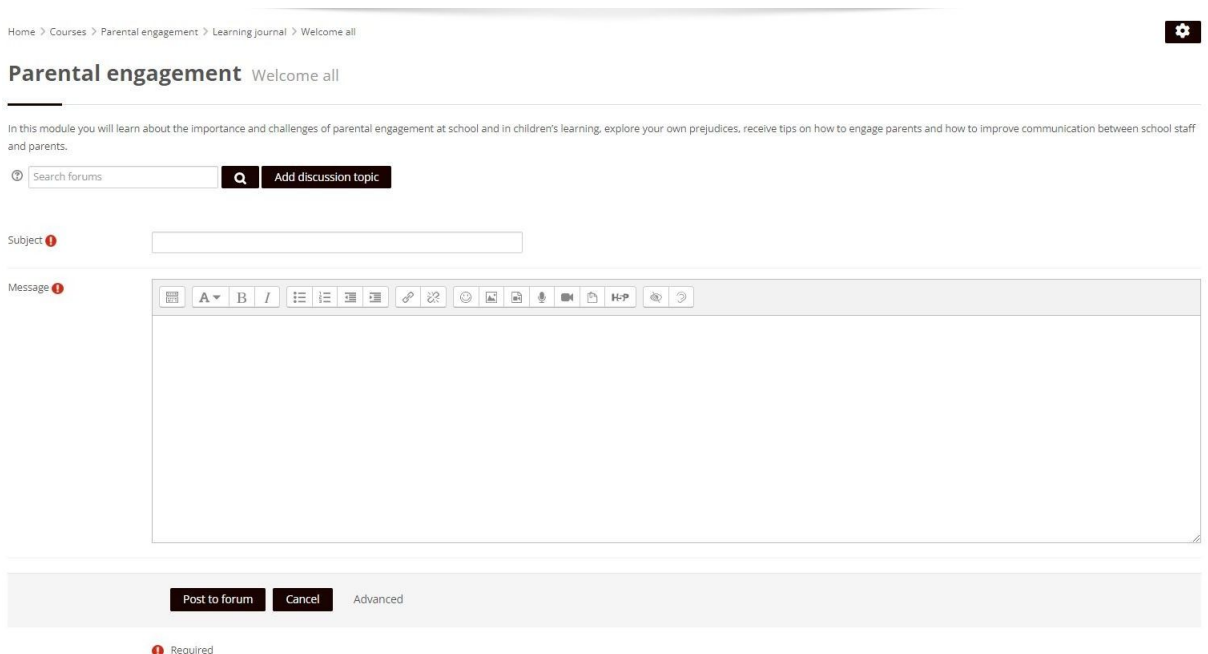

Figure 14 - Posting to a forum

Mail now

If you tick the Mail now check box, the announcement email will be sent to everyone who is subscribed to the forum, without the usual delay to allow for possible editing of your forum post.

Note - If a student has unsubscribed from a forum they will not receive any notification.

Post to forum

Click on the 'post to forum' box to post the message.

Forum Subscription Mode

By default, the unit forums are first set up with all students subscribed by the '**Auto subscription**'. Students can change their subscription status at any time so posting to the forum is not a guarantee that all students will receive the information.

*Student cannot unsubscribe from the '**News and Announcement**' forum. A message posted to this forum will be sent to all students.*

Forum etiquette

- Read the forums rules and guidelines before posting for the first time.
- Be civil. Personal differences should be handled through email or phone and not through posts displayed to everyone.
- Stay on topic.
- Do not submit a post that requires readers to download a large attachment. Either explain the attachment or, better yet, provide a link to the information.
- In order to be understood by most people, use correct spelling, grammar and suitable language. Act in a give and take manner; help others as often as or more than you ask for help.
- Do not use all caps or SHOUT in your posts. In addition, one exclamation point is enough.
- If it is a new topic then start a new thread.
- Be aware that posts may be read by people from a variety of backgrounds and ages so be thoughtful with your choice of wording.
- Do not post any information that you want private. Posts should not contain personal, identifiable information or content embarrassing to others.
- Do not post content that violates a copyright.
- Be aware many people are new to using forums and need support and encouragement.

Messages

The following extract from moodle.org/documents outlines the Messaging functionality of the MICROVET.

Teachers, students and other users may send and receive private messages via Moodle. This is in addition to receiving notifications about assignments, forum discussions etc.

New messages are highlighted with a number in the messaging menu at the top of the screen:

Note that the number reflects the number of people who have sent new messages, and not the actual number of new messages.

Clicking there displays the new messages, along with the option to send a new message (1 below), to mark all as read (2), to go to their preferences page (3) to change how messages are received, and (4) to view all messages.

Sending messages

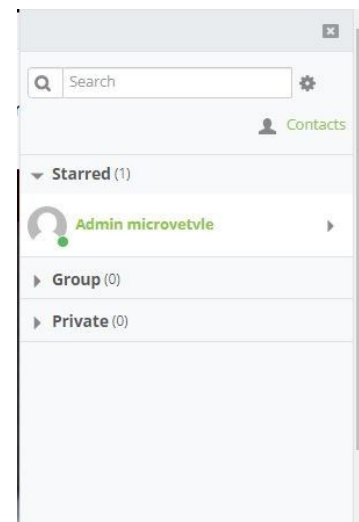

Messages may be sent from a number of locations:

1. by clicking 'New Message' from the Message menu as in the screenshot above and then searching for a user or course
2. by clicking the Messages link in the user menu;
3. by clicking on a user's name or picture in a course, for example from the Participants link or in a forum thread;
4. from the [Messages block](#) if available.

When sending messages, the size of the message box will increase as the message lengthens. Note that to start a new line, you can press Enter. (Pressing Enter alone will not send a message.)

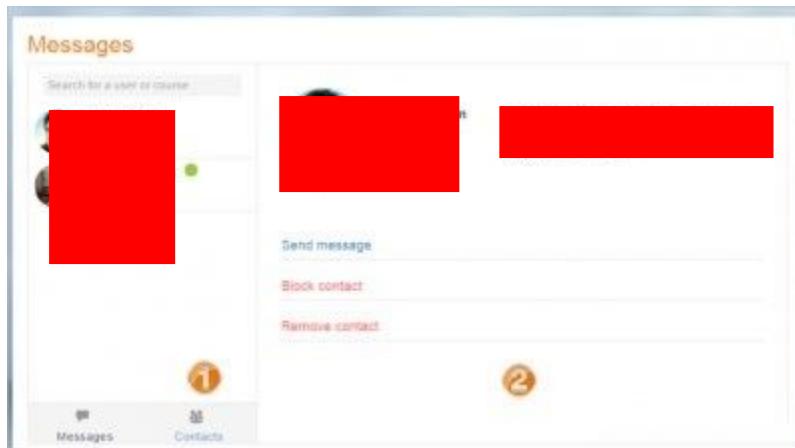

Adding and messaging contacts

To add a contact, click their name or picture as in the section Sending messages above:

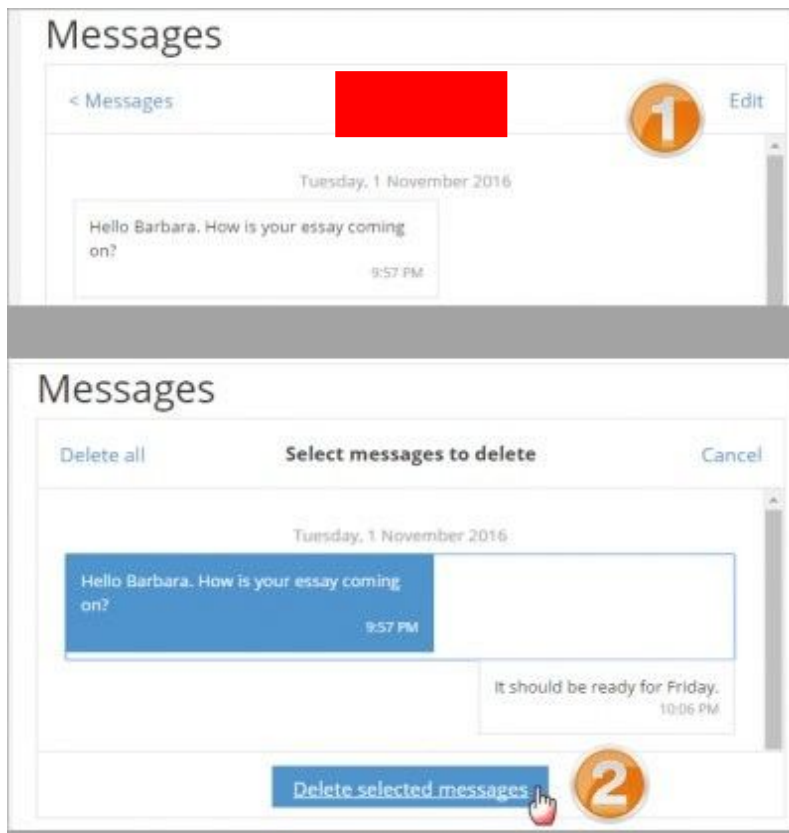

1. Click the + sign to add them to your contacts.
2. Click the Message icon to message them directly.

Contacts may be accessed from the Contacts link and then either messaged, blocked or removed.

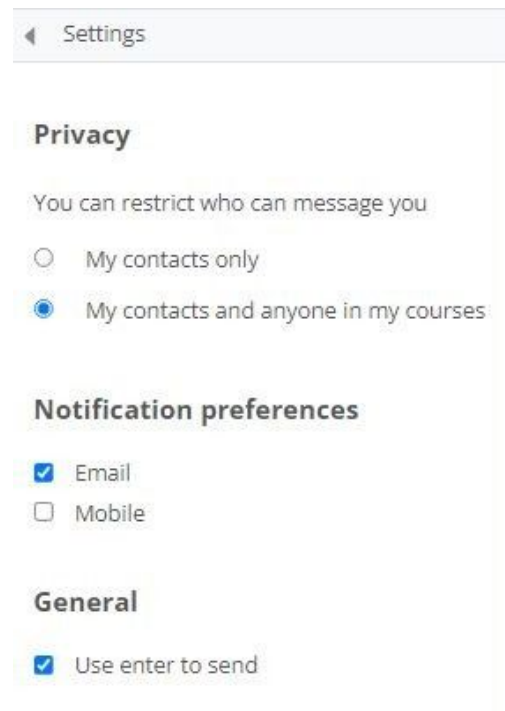

Deleting messages

- Messages may be deleted by clicking the Edit link (1 below), selecting a message or messages to delete and then clicking the Delete button under the messages (2).
- Note that messages are only deleted for that particular user, not others involved in the conversation.

Receiving messages

- Along with a visible alert to new messages in the messaging menu, users can configure how they are notified of new messages from their message preferences page accessed from the user menu or the gear icon in the messages menu.
- If the site is set up with the mobile app, they can enable new message alerts to be sent to their mobile:

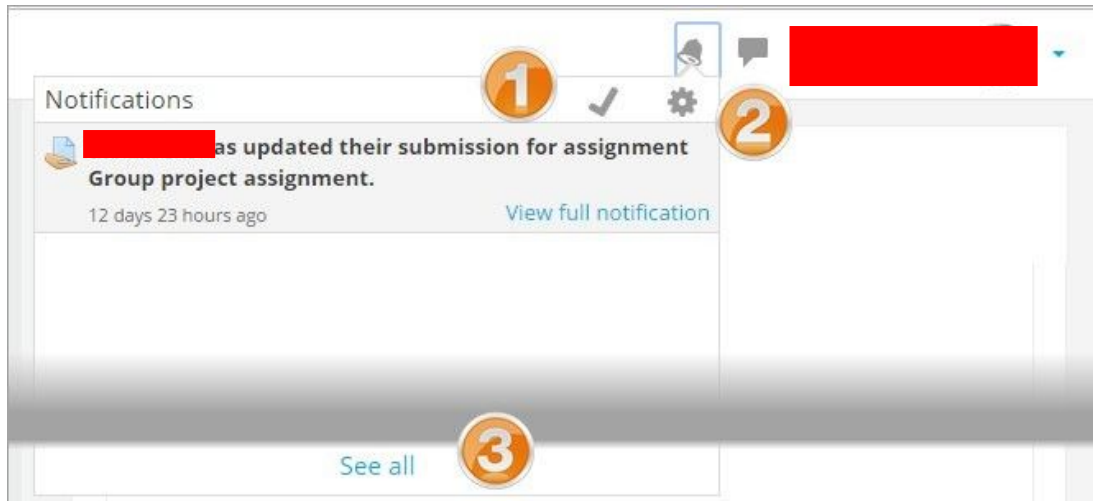

Notifications

The following extract from moodle.org/documents outlines the Notifications functionality of the MICROVET.

- Notifications alert teachers, students and other users about events in Moodle such as new forum posts, assignment grading.
- New notifications are highlighted with a number in the notifications menu at the top of the screen:

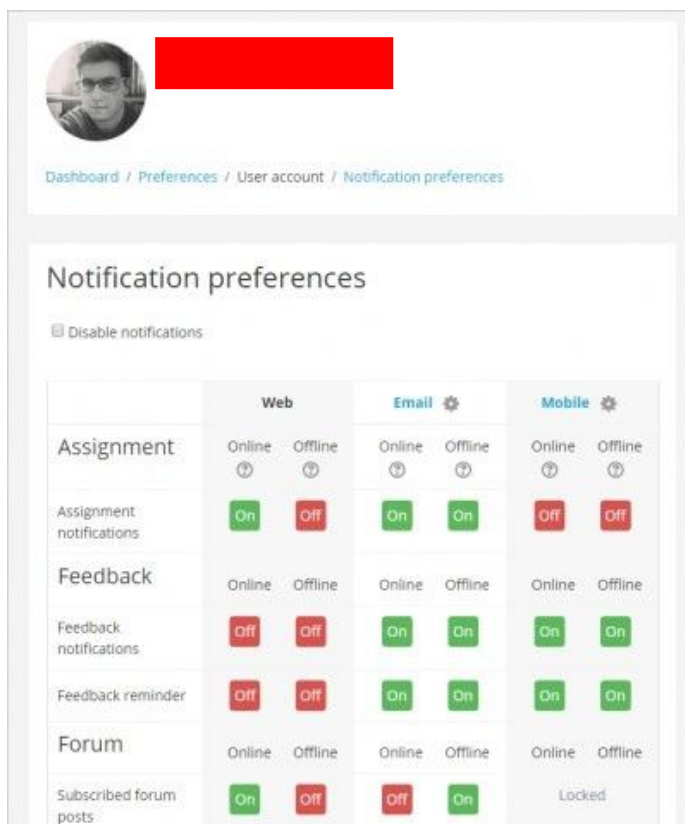

Clicking there displays any new notifications, along with the option to mark all as read (1 below), to go to the notifications preferences page (2) to change how notifications are received, and (3) to view all notifications.

Clicking 'View full notification' displays the notification in a full list, whereas clicking the main body of the notification will take you to the location in Moodle that the event happened, as in this example, to the assignment grading screen.

Receiving notifications

- Along with a visible alert to new events in the notifications menu, users can configure how they are notified of new events from their notification preferences page accessed from the user menu or from the gear icon in the notifications menu.
- Notifications may be sent via the web (when logged in to Moodle), email and mobile
- Web offline options are for setting whether a user is notified when they next log in to Moodle.

Your Responsibilities

When you are enrolled you agreed 'to abide by MICROVET policies, instructions and rules' and you confirmed the accuracy of the information that you supplied. As a student of MICROVET you have a right to study, learn and develop your skills in a safe, healthy and supportive educational and social environment.

As a student, you also have certain responsibilities to your fellow students and teachers. These include:

- treat other students and MICROVET staff with respect, fairness and courtesy
- not engaging in plagiarism, collusion or cheating in any assessment event or examination
- submitting all assessment tasks by the due date or ask for an extension of time if there are exceptional circumstances
- not behaving in a way that could offend, embarrass or threaten others
- using facilities in a responsible, ethical and lawful manner

Student FAQ's

The following is provided to assist in some of the general queries that a student may ask during their studies.

Access and navigation

Why can't I log in?

There could be many reasons but the most probable is you have simply forgotten your password, are trying the wrong one or are entering it incorrectly. Some other things to think about include:

- Does your username or password contain a mixture of upper and lower case letters? It should be entered exactly.
- Are cookies enabled on your browser? (they should be)

Why can't I find my profile or navigation?

In Moodle it is possible to 'dock your blocks'; this moves them from your main screen and locks them in the top left hand corner of your screen. You can undock them if you prefer by clicking the arrow to bring them into the main section of your screen.

Emails and forums

Why am I not getting any emails and others are?

Chances are your email address in your profile is either wrong or disabled. It could also be that you are not subscribed to the forums that are generating emails.

How can I stop all of these emails?

Emails are an essential part of the way Moodle works. They are used to keep you up to date with what is going on. If you wish to reduce the amount of emails you get you could:

1. Edit your profile and change your email settings to digest
2. Unsubscribe from non-essential forums (although they are there for a reason!)
3. Disable your email address in your profile although this is not recommended and may go against in-house rules.

Assignments and grades

Why is there no upload box?

This is either because:

- The assignment has now closed
- The assignment is not yet open
-

You already uploaded something and the settings prevent resubmissions

How can I see my recent assignment feedback?

There are many ways you can access your feedback. The most common method is by simply going to the same place where you uploaded the work. Another common method is to follow the link in the recent activity block (if the Unit Chair has included it on the course). Another method would be to access the grade book and then follow the link for the required assignment. Depending upon how the assignment was set up, you may receive an email when it has been marked with a direct link to the feedback.

Why is my course average so low?

Don't panic! The Moodle gradebook takes into account unmarked and unsubmitted work. In other words, you start with zero and as you progress through the course and complete graded activities the percentage will steadily rise

Quizzes

Why can't I access the quiz?

This is either because:

- The quiz is now closed
- The quiz is not yet open
- You have already used all your allowed attempts (in most cases 2).

In all cases contact your teacher for assistance. They can make arrangements to allow you to complete your required study.

Which button do I press when I have finished a quiz?

Once you complete the quiz you will be required to 'submit all and finish'

You can then use the navigation bar to navigate back to the front page of your unit/ topic and continue with your studies. There is additionally a button in the middle at the bottom of the page that will take you to the front page of your unit/topic.

Why am I getting zero grade on my quiz?

You might have exceeded the quiz time limit. It is also possible that when you have an intermittent internet connection that you will lose service and use up one of your attempts. For this reason it is important that when completing a quiz that you are on a stable, reliable internet connection.

About this Guide

We hope that this guide to the MICROVET implementation of its Moodle (MICROVET) is helpful and provided you with an understanding of the key elements in delivering your studies online.

Moodle Documentation

Full documentation relating to Moodle can be viewed at <https://docs.moodle.org>

MICROVET has implemented a 'vanilla' implementation of Moodle which means that the majority of information found via the above link and in Moodle training videos, webinars, and presentation can be directly applied.

It is not the intention of this document to be an exhaustive resource for Moodle.
