

INTRODUCING MICRO-CREDENTIALS TO THE DIGITAL ERA OF VET

2021-1-NL01-KA220-VET-000025022

microVET

THE PROJECT

Focus >

The microVET project foresees to introduce and familiarize target groups, stakeholders, and any other relevant actor with the micro-credential approach that can contribute in the provision of high-quality, attractive, and responsive training opportunities that correspond to specific needs of various types of learners. The project addresses the need for more flexible training opportunities emerged from the impact of COVID-19 and the transition towards sustainable and digital approaches in multiple strategic sectors.

The development and attendance of microVET courses will increase the opportunities for professional development in a constantly changing labour market for trainers and trainees.

PROJECT RESULTS

Tools >

The microVET consortium aims to produce 4 project results that will be freely accessible by all. The project results will be available for the EU citizens throughout and beyond the project completion.

PR1. Methodology for the development of microVET Courses. State of the art on the current situation on micro-credentials.

PR2. MicroVET courses linked to micro-credentials. Online training courses linked to micro-credentials.

PR3. MicroVET Repository. Open online library for micro-training.

PR4. EU alliance for micro-credentials. A networking effort for the permeability of actors on micro-credentials.

STATE OF THE ART

Research >

A report on the current state of the art regarding the use of micro-credentials in the field of vocational education and training on partner countries has been completed. The report focuses on the progress towards familiarisation with and up-taking of the micro-credential approach, emerging needs of training organisations, learners, and the business sector, as well as recommendations on the establishment of synergies and the organisation of common initiatives to better adjust to future requirements.

CONSORTIUM

Partners >

The project is being developed in 6 European countries and the 7 partner organisations are active in the fields of VET, research, education and training.
